

FEDERATION OF
EUROPEAN
AQUACULTURE
PRODUCERS

WE ARE **THE SOLUTION** 
 WE ARE **THE FUTURE**

The key role of aquaculture
for safe and healthy food

OUR FEDERATION

WHO WE ARE

The Federation of European Aquaculture Producers (FEAP) provides the united voice of the European fish farming profession, representing both marine and freshwater fin fish. The Federation is composed of national fish farming associations representing 22 national associations from 21 countries. All members are European but not all are from the European Union.

OUR AIM

Is to share knowledge and best practice while raising the skills of professionals within the sector and to promote innovative and effective research in order to increase the competitiveness and sustainability of our operations.

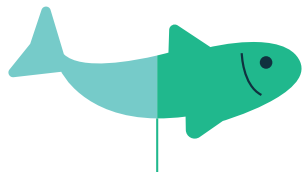

THE CHALLENGE

The need for protein

↑ **73%**

Worldwide animal **protein** consumption will rise by nearly **73%** by 2050

While today **50 %** of global seafood comes from aquaculture...

...only **20 %** of seafood in the EU (European Union)...

...and **40 %** in Europe (including Norway, Turkey and Iceland)

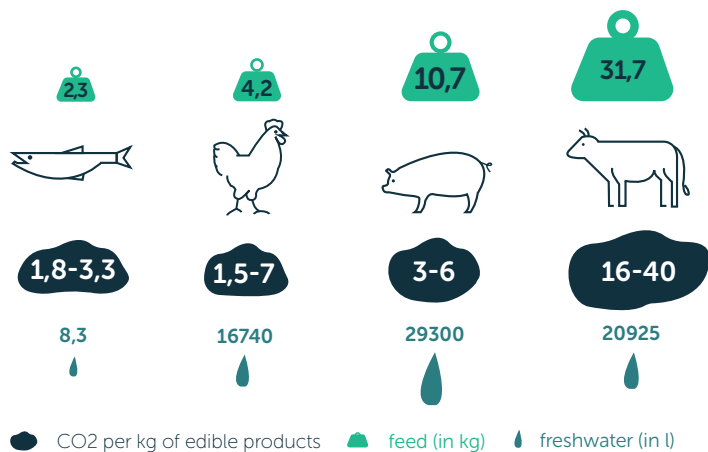

comes from farmed fish.

Stagnation of the sector – since our creation in 1968, aquaculture production in Europe grew steadily up until the turn of the century and has since then averaged -7 % growth over the last decade. The stagnation does not represent the huge potential the aquaculture sector has in providing safe, **sustainable seafood for the customer.**

To answer the need for more food, aquaculture needs to **grow** and **diversify in Europe** and globally.

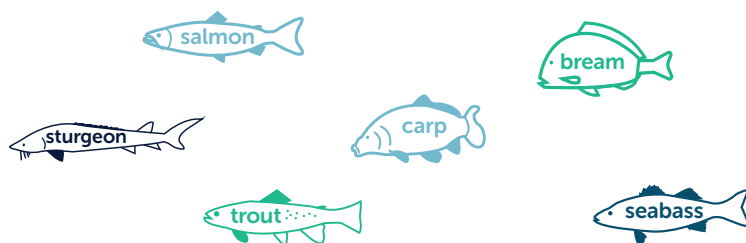

WE ARE THE SOLUTION

NEEDS & IMPACT TO PRODUCE ONE KG

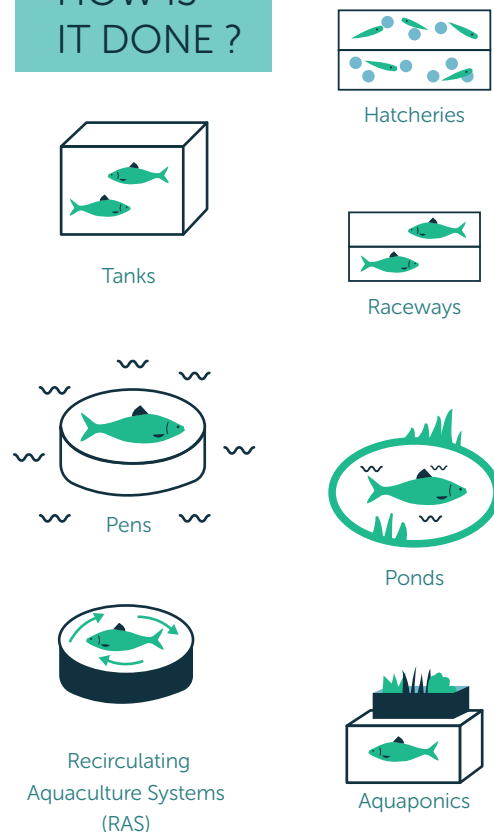

Aquaculture is **the most efficient producer** of **animal protein** as food

WHICH FISH DO WE FARM IN EUROPE ?

Efficient and adaptable production

HOW IS IT DONE ?

Aquaculture can be done everywhere, and is the most **adaptable** and **efficient way** of providing **safe** and **healthy food**

FEAP is committed to the development and promotion of sustainable aquaculture, providing **safe and healthy food** while respecting the environment. The challenges of 2050 must be answered quickly and FEAP is dedicated to supporting **innovative actions** that enable excellence in the production process, while fully guaranteeing consumer and society's interest.

WE ARE THE SOLUTION 
 WE ARE THE FUTURE
